

Hematology: Tenure-Track Faculty Positions
Washington University in St. Louis
Barnes-Jewish Hospital

The Hematology Division of the Washington University School of Medicine, St. Louis, Missouri, is seeking up to three physician-scientists at the level of Assistant Professor or Associate Professor. Candidates should have an MD or MD/PhD degree. Board certification in hematology is desirable. New faculty will be expected to establish independent laboratory-based basic or translational research programs and to participate in the consulting services provided to the associated Barnes-Jewish Hospital. The Hematology Division currently has 14 faculty members engaged in a wide range of biomedical and basic science research (see <http://hematology.im.wustl.edu/faculty/faculty.html>). Washington University is known for its interactive and collaborative atmosphere.

Successful candidates will receive an attractive start-up package and guaranteed protected time to initiate their research. Faculty at Washington University have access to a large number of state-of-the-art clinical and basic science core facilities including tissue banking, microarray, sequencing, proteomics & mass spectrometry, biomedical informatics, and mouse transgenics. The Genome Center at Washington University is world-renowned.

Washington University School of Medicine and Barnes-Jewish Hospital are located in St. Louis, Missouri, a family friendly metropolitan area of over 3 million. Washington University School of Medicine is routinely ranked among the top medical schools in the United States. Barnes-Jewish Hospital is a 1,050-bed hospital with state-of-the-art facilities for all aspects of patient care.
